- Majored in serverside communications

2004-09 -
2008-05

Associate of Applied Science: Printing Technology

Helsinki Vocational School - Helsinki

Interests

I'm always eager to learn new things about coding, so I can keep my skills up to date. I also strive to maintain general knowledge up to date about common technologies. I plan to become a talented professional in front-end- and back-end side programming. But first I think it's better to get to know one of these fields.

My hobbies mostly include cycling in my free time and messing with my computers and electronics.
